

Drainage problems solved

At some point all drains need to be cleared out. The inevitable build up of fat, washing detergent, silt and scale reduce the pipe flow leading to a blockage.

When the job needs to be done look no further than MP Drainage and Maintenance, the family-run drain maintenance business which is based in Malvern. Its promise is to provide a friendly and reliable service with staff on call 24-hours a day, seven days a week all-year round.

There is no call-out charge and customers are given a free, no obligation quote. Staff are dedicated to providing immediate response to people living in Malvern, Worcester, Ledbury and other nearby towns.

They are fully-equipped to deal with any drainage problem - no matter how big or small - domestic or commercial. Whether this is a blocked drain, or

the serious problem of a collapse, staff will be able to provide technical diagnoses through CCTV equipment.

Drainage reports for home-buyers are also offered. After emergency work is carried out engineers may arrange to complete any further work during normal hours to save any expense.

MP Drainage and Maintenance offers a full, professional service and it is confident it can beat any other quotes for unblocking drains.

Customers can also call on the firm's expertise for drain relining, drain excavation, root removal, unblocking sinks, lavatories and baths, clearing gutters and gullies, manual rodding, descaling, manhole repairs and pipe laying. A home maintenance service is also offered either in the home or the garden, including aerial upgrades in time for the switchover to digital TV.
